INTRODUCTORY

IN presenting our 1923-24 Catalogue to the trade, we desire to call attention to the many advantages in handling

"THE READING LINE"

The varied line of items from which to select.

Superior shapes and styles of all types of hammers and hatchets is our aim.

High grade material used.

Original designs, extra fine finish.

Our Policy: The best value for the money, large stock of finished goods, thereby insuring prompt shipment, and a large line of over 1,000 items which can be sold profitably at 5, 10, 15, 25 and 50 cents and \$1.00, and a large assortment of "Reading" goods at little cost is a profitable investment.

THE READING SADDLE AND MFG. CO.

No. 818—10 inch sweep

GLASS CUTTERS

TURRET HEAD

The turret contains six high grade steel wheels, hardened and tempered and carefully tested.

The turret may be revolved on or clamped to the frame by the screw, the head of which appears on the reverse side of the tool from that shown in the cut.

This screw is slotted so that it may be operated by a screw driver, thus enabling any of the cutters to be placed in position for use instantly.

The turret is held within a circular recess, which protects all of the cutters not in a position for use.

When desired, the turret may be removed, and new cutters inserted instantly and with ease. The axles are permanently secured to prevent their falling out while new wheels are being inserted.

Highest quality of materials used only in this cutter. Rosewood finished handle, nicked ferrule. Cutter head and revolving turret of highest quality steel, polished and nicked.

No. 826—Turret Glass Cutter Per Gross
Weight per gross about 18 pounds. Packed one dozen in a box.

The "Major"

Special high quality steel wheel and cutter. Rosewood handle. Blade highly polished. Quality at a price is represented in this cutter.

ECLIPSE PINEAPPLE EYER AND STRAWBERRY HULLER

PATENT APPLIED FOR

The most satisfactory eyer on the market.

First peel pineapple.

Hold the Eyer as in the sketch.

The spring keeps it open ready for use.

Stick the spoon-shaped jaws into the pineapple covering the eye; when in to the proper depth press the handles and pull.

The eyes are forced to the back of the jaws, where they drop.

After a few trials you can remove the eyes without losing any of the pineapple.

By holding over a dish the juices can be preserved, as the Eyer squeezes all out of the eyes.

It can also be used for hulling strawberries.

Per Gross

No. 110—Nickel-plated

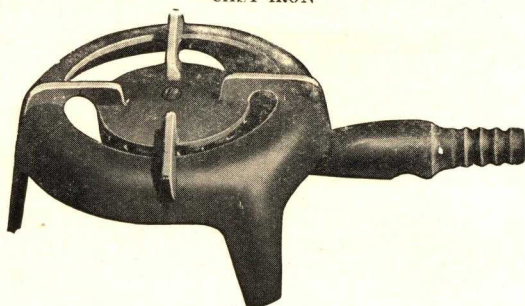

Weight per gross about 32 pounds.

Packed one dozen in a box.

THE TWENTIETH CENTURY VENTILATED LUNCH BOX

PATENTED

		Per Gross
Small,	size 8 $\frac{1}{4}$ x 4 $\frac{1}{4}$ x 4 $\frac{1}{4}$ inches.....	
Medium,	size 9 $\frac{3}{4}$ x 4 $\frac{5}{8}$ x 5 $\frac{1}{2}$ inches.....	
Large,	size 11 $\frac{1}{4}$ x 5 $\frac{1}{4}$ x 6 inches.....	

Advantages of this Box over the square-cornered Box are as follows:

Round ends prevent dirt from lodging in the corners.

Round ends allow Box to be thoroughly cleansed by rubbing lightly with a damp cloth or sponge.

No square corners to catch in clothing, and therefore no scuffing as on square-corner Boxes.

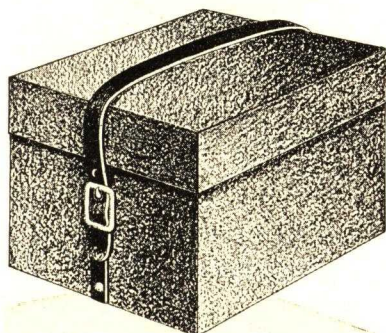

Protected ventilators in lid causes perfect circulation.

Water-proof lining and special coverings prevent grease from showing on the outside.

Knowing the great advantages of our Box over the square-cornered, we have taken out letters-patent and warn infringers.

CUTLERY

THE CUTLERY illustrated on the following pages is the highest quality of Cutlery that is sold today, and we think that our following guarantee, which is an *absolute guarantee*, covers and protects all people, from consumer to manufacturer.

Our Guarantee

Every dollar's worth of goods that we send out is shipped with the unqualified agreement that the goods shall be satisfactory to the purchaser in every particular, otherwise they are returnable at our expense. In case of any dissatisfaction we not only pay the freight charges both ways, but we also pay all cost of cartage, unpacking, examining and repacking the goods. And if a retailer or consumer is not entirely satisfied with a purchased article of our Cutlery, our customer is especially urged to adjust the matter to the entire satisfaction of all parties concerned without regard to cost, **AND CHARGE ALL THE COSTS UP TO US.**

Highest quality cutlery steel, oil tempered. Highly finished and hand ground. Rubberoid finished handles. Set composed of cleaver, bread knife, butcher knife, pot fork, paring knife, can opener, and meat saw. Nothing on the market today to compare with this set at the price.

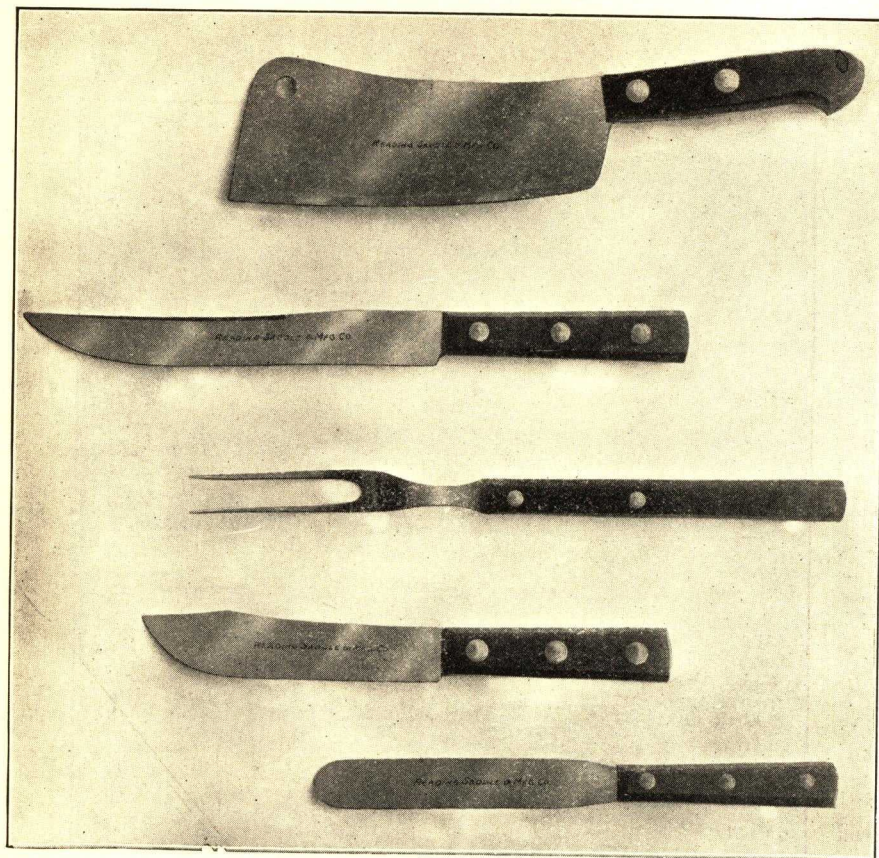

No. 1000—Kitchen Set Per Set

Weight per gross about 216 pounds.
Packed one set in a box.

The **READING** Line

BEST BY TEST

Cleavers, Slicers, Forks, Butcher Knives, Spatulas

These articles represent the highest quality today offered to the trade. The steel is made from a special formula and is the highest carbon cutlery steel made. **The pieces are all forged out** (not press-cut), from sheet or double sheet, the tangs **are not rolled** and hammered down to represent forged goods. But they are **forged** from the highest quality steel obtainable. The blades have a finish that is not to be equalled, ground by hand on grindstones to a keen edge, and because of the steel used, they hold their edge. High finished walnut handles, brass riveted and burred. Cleaver has 7 inch blade; Slicer 9 inch blade; Fork 12 $\frac{3}{4}$ inches over all; Butcher Knife 6 inch blade; Spatula 8 inch blade.

NEVERSLIP

The one practical Grip used and appreciated by bicycle and motor cycle repairmen. Fits any size nipple; adjusted in a second. The only Grip that fits the hand. The big seller.

No. 2213—Neverslip Nipple Grip Per Gross

Weight per gross about 33 pounds.

Packed one dozen in a box. Nickel-plated.

BABY

Same principle as the Neverslip. Every rider will want one. Put it on your key ring, in your pocket or toll bag; always with you. The rider's favorite.

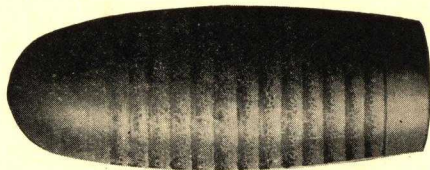

No. 2214—Baby Nipple Grip Per Gross

Weight per gross about 9 pounds.

One dozen mounted on display card. Nickel-plated.
